

Factorio — User Guide

Invoice financing, end to end

Generated 2026-07-16 · Live at factorio.co.uk

Factorio is an invoice-financing (factoring) marketplace. Businesses sell their unpaid invoices for cash today; investors fund those invoices for a short-term, asset-backed return. This guide walks through every screen — the public site and the investor product app — one screen per slide.

What Factorio is

- An invoice-financing marketplace connecting two sides: **sellers** who need cash now and **investors** seeking short-term, asset-backed returns.
- One site serves both — a marketing front and an HTMX-driven product app.
- The hero summarizes the model: advance rate, days-to-funding, sectors served and total funded volume (UZS).
- Fully trilingual — English, O'zbekcha and Russian — switched from the top navigation.

Turn invoices into working capital

- Get a large share of an invoice advanced in days instead of waiting 30–120 days for the debtor to pay.
- The seller journey: submit an invoice → get it verified and risk-graded → receive the advance → settle when the debtor pays.
- Factoring, not a loan — no new debt on the balance sheet; funding scales with sales.
- Built for manufacturing, wholesale, construction, logistics and services.

The screenshot shows the Factorio website interface for sellers. The top navigation bar includes the Factorio logo, links for 'For Sellers', 'For Investors', 'How it works', 'Pricing', and 'Contact', a UK flag, and buttons for 'Get a quote' and 'Log in'. The main content area features the heading 'FOR SELLERS' followed by the large headline 'Get paid now for the work you've already done.' Below this is a sub-headline: 'Stop waiting for invoices to clear. Upload a verified invoice and receive up to 90% of its value in 1–3 business days. When your customer pays, you get the balance minus a small fee.' A second section is titled 'How invoice financing helps your business.' and contains two benefit boxes: 'Faster business growth' (Hire more staff and win new contracts without waiting 30–90 days for payment.) and 'Better supplier terms' (Many suppliers offer discounts for up-front or early payment. Capture those savings.).

FOR SELLERS

Get paid now for the work you've already done.

Stop waiting for invoices to clear. Upload a verified invoice and receive up to 90% of its value in 1–3 business days. When your customer pays, you get the balance minus a small fee.

How invoice financing helps your business.

Faster business growth

Hire more staff and win new contracts without waiting 30–90 days for payment.

Better supplier terms

Many suppliers offer discounts for up-front or early payment. Capture those savings.

Short-term, asset-backed returns

- Fund verified invoices and earn a fee/return over a short hold — often just weeks.
- Diversify across debtors, sectors and risk grades (A–D).
- Returns are tied to real receivables, not market speculation.
- Leads into the investor app — dashboard, marketplace and portfolio.

Four steps, end to end

- **Submit** — a seller uploads an invoice and company details.
- **Verify** — Factorio checks the debtor and assigns a risk grade and pricing.
- **Fund** — the invoice appears on the marketplace; investors fund it to its goal.
- **Settle** — when the debtor pays, principal + interest are distributed and the position closes.

Where every party's money comes from

Money & payment flow — seller, payer, platform, capital

- The **seller** delivers goods and issues a SoliqOnline e-invoice; the **payer (debtor)** owes the invoice amount.
- The platform advances ~85% to the seller now, funded by the **capital source** — the bank's balance sheet, investors, or the DIFC SPV.
- At maturity the **payer pays 100%** into the collection account; the seller receives the net balance, the capital source gets principal + return, and the platform keeps a volume-based fee.
- The flow is identical whoever funds it — which is what makes the investor / SPV layer pluggable.

The seller's journey, end to end

From sign-up to advance in 24–48 hours

- Sign up (bank KYC) → invoice auto-imported from SoliqOnline → request financing in an AI-triage chat.
- Debtor scoring returns indicative terms; the bank approves in one click; collateral is registered with the CBU in under an hour.
- The advance lands in the seller's account in 24–48 hours — no branch visit, no paper.

The investor's journey, end to end

From onboarding to distribution

- Onboard (KYC / accreditation) → commit capital via the marketplace or the SPV → auto-invest or pick invoices.
- Hold the position with AI portfolio reporting on demand; when the debtor pays at maturity, principal + return are distributed.
- **Decomposable:** the origination piece (bank-funded) can launch first; the investor marketplace and SPV plug in later, independently.

Transparent, per-invoice fees

- Pricing is per invoice — a fee per 30 days against the advanced amount, with no hidden charges.
- Shows the headline advance rate and worked example economics.
- No subscription and no commitment to submit an invoice.
- A clear breakdown so both sides understand the return and the cost.

The screenshot shows the Factorio website's pricing page. The header includes the Factorio logo, navigation links for Sellers, Investors, and other services, and a language selector. The main heading is 'Simple, transparent pricing. No surprises.' followed by a subtext: 'No setup fees. No monthly minimums. You only pay when you get funded.' Below this, three pricing tiers are presented in separate boxes: 'FOR SELLERS' with a 1.5-3% fee per 30 days, 'FOR INVESTORS' with an 8-12% target annualised return, and 'ENTERPRISE' with custom volume pricing. Each tier includes a brief description of the pricing basis and a list of features or benefits.

PRICING

Simple, transparent pricing. No surprises.

No setup fees. No monthly minimums. You only pay when you get funded.

FOR SELLERS

1.5–3%

fee per 30 days

Based on invoice size, debtor credit quality, and payment terms. No setup fee, no monthly minimums.

- ✓ Advance rate up to 90%
- ✓ Funding in 1–3 business days
- ✓ No long-term contracts

FOR INVESTORS

8–12%

target annualised return

Returns depend on invoice duration, risk grade, and fee structure. Transparent pricing on every listing.

- ✓ Minimum \$50 per invoice
- ✓ Risk grades A–D
- ✓ Auto-invest available

ENTERPRISE

Custom

volume pricing

For businesses with \$80,000+ monthly invoice volume. Dedicated terms, API access, and priority verification.

- ✓ Custom advance rates
- ✓ Same-day funding
- ✓ API integration

Get in touch

- A contact page for sellers and investors to reach the Factorio team.
- Shows the contact email and a simple enquiry form.
- The entry point to start onboarding.

The screenshot shows the Factorio website's contact page. The header includes the Factorio logo, navigation links for 'For Sellers', 'For Investors', 'How it works', 'Pricing', and 'Contact', a UK flag, and buttons for 'Get a quote' and 'Log in'. The main content area has a 'CONTACT' sub-header, followed by the heading 'Let's talk about your cash flow.' and a promise to respond within one business day. Below this is a form with four fields: 'YOUR NAME', 'EMAIL', 'COMPANY (OPTIONAL)', and a larger text area for 'TELL US ABOUT YOUR INVOICE FINANCING NEEDS'.

Your personalized overview

- The `/app` home greets the current investor and leads with their own KPIs: portfolio value, net annual return, earned-to-date and the next settlement.
- A recent-activity feed surfaces notifications — fundings, settlements and updates.
- Quick actions jump to the marketplace, portfolio and statement.
- Platform-wide stats are kept as a secondary strip.
- Top-right **investor switcher** lets you view the app as any investor (demo, no password).

Browse fundable invoices

- Every open, fundable invoice is a card: debtor, sector, risk grade, amount and a live funding-progress bar.
- Each card shows the key economics — advance rate, fee per 30 days and estimated return — plus the target hold in days.
- The filter bar narrows by sector, risk grade, maximum term and minimum return.
- Click a card to open the full invoice detail.

Full transparency before you invest

- The headline shows the debtor, risk grade, sector and invoice number.
- A funding panel: amount raised vs goal, advance rate, fee and estimated return.
- A **debtor-company profile** lists registration number, sector, country and annual turnover.
- Everything needed to make a funding decision on a single screen.

The screenshot displays the Factorio Investor App interface for an invoice detail view. The top navigation bar shows 'VIEWING AS investor1' with a dropdown and a flag icon. The left sidebar contains a menu with categories: FACTORING (Dashboard, Marketplace, Portfolio, Statement, Auto-invest, AI Triage, AI Reports, Console, Accounting), SALES (Pipeline), and WORKSPACE (Drive, Docs, Mail). The main content area is titled 'Wayne Enterprises' with the subtitle 'Invoice #INV-20260019 - Seller: Summit Freight (GB)'. Below this, a progress bar shows '\$49,931 raised of \$61,848 goal'. A table provides key metrics: INVOICE (\$76,140), ADVANCE (81%), FEE / SDD (3.0%), and EST. RETURN (17.7%). To the right, a 'DEBTOR PROFILE' box lists: SELLER (Summit Freight), REGISTRATION (GB14265799), SECTOR (Logistics), COUNTRY (GB), and ANNUAL TURNOVER (\$28). On the far right, a 'Copilot' chat interface is visible with the prompt 'Ask me about funding, exposure, the pipeline or portfolio.' and several suggested questions: 'How much have we funded?', 'Which sector has the most exposure?', 'Top debtors by concentration', and 'Summarise the sales pipeline'. A 'Send' button is at the bottom right of the chat.

The reporting cockpit

- Two hero panels: **net annual return** (interest received, write-offs, net income) and **account value** (active invested, expected outstanding, realized).
- An **investments aging table** buckets active positions by days to / past due.
- A **payment-habits table** shows how settled invoices actually paid — early, on time, late or written off.
- A positions table lists every investment with realized return, settlement date, grade and status.

The screenshot displays the Factorio Investor App interface. The top navigation bar shows 'VIEWING AS investor1'. The left sidebar contains sections for FACTORING, SALES, and WORKSPACE. The main content area is titled 'Your investment portfolio.' and features two hero panels: 'NET ANNUAL RETURN' showing 0.0% and 'ACCOUNT VALUE' showing \$46,523. Below these are tables for 'Investments by status' and 'Debtor payment habits'. The right sidebar includes a 'Copilot' chat interface with a 'Send' button.

NET ANNUAL RETURN

Interest received	\$0
Write-offs	-\$0
Net income	\$0

ACCOUNT VALUE

Active investments	\$46,523
Expected returns outstanding	\$3,594
Realized returns	\$0

Investments by status

STATUS	INVOICES	EXPECTED PRINCIPAL	EXPECTED INTEREST
--------	----------	--------------------	-------------------

Debtor payment habits

STATUS	INVOICES	PERCENTAGE	AMOUNT
--------	----------	------------	--------

Copilot

Ask me about funding, exposure, the pipeline or portfolio.

How much have we funded?
Which sector has the most exposure?
Top debtors by concentration
Summarise the sales pipeline

Ask about the data... Send

Every transaction, filterable

- A unified ledger of cash movements: investments out (–) and settlements in (+).
- Filter by date range, type, counterparty, invoice number and minimum amount.
- Signed amounts in UZS, newest first.
- One-click **CSV export** for bookkeeping and reconciliation.

The screenshot displays the Factorio Investor App interface for the 'ACCOUNT STATEMENT' section. The left sidebar contains navigation links for FACTORING (Dashboard, Marketplace, Portfolio, Statement, Auto-invest, AI Triage, AI Reports, Console, Accounting), SALES (Pipeline), and WORKSPACE (Drive, Docs, Mail). The main content area is titled 'Your transaction history.' and includes a filter section with fields for FROM, TO, TYPE, COUNTERPARTY, INVOICE NO., and AMOUNT. Below the filter section is a table of transactions.

DATE	TYPE	COUNTERPARTY	INVOICE NO.	AMOUNT
2026-04-28	Investment	Bluth Company	INV-20260007	–\$18,752
2026-03-29	Investment	Massive Dynamic	INV-20260028	–\$27,771

On the right, the 'Copilot' sidebar is active, showing a list of prompts: 'Ask me about funding, exposure, the pipeline or portfolio.', 'How much have we funded?', 'Which sector has the most exposure?', 'Top debtors by concentration', and 'Summarise the sales pipeline'. A 'Send' button is at the bottom of the sidebar.

Set rules, invest automatically

- Configure automated bidding: minimum risk grade, maximum amount per invoice and preferred sectors.
- Toggle the strategy active/inactive; the status is shown at the top.
- Rules are saved per investor and applied to matching new invoices.
- Modelled on investly.co's autobidder.

The screenshot shows the Factorio web application interface. On the left is a sidebar menu with categories: FACTORING (Dashboard, Marketplace, Portfolio, Statement, Auto-invest, AI Triage, AI Reports, Console, Accounting), SALES (Pipeline), and WORKSPACE (Drive, Docs, Mail). The 'Auto-invest' option is selected and highlighted. The main content area is titled 'AUTO-INVEST' and 'Automate your investing.' with the subtitle 'Set your rules and let Factorio place bids on matching invoices automatically.' Below this is a settings card. At the top of the card is a 'STATUS' section with a green 'Active' toggle. The card contains three main sections: 'MINIMUM RISK GRADE' with a dropdown menu set to 'B', 'MAX PER INVOICE' with a text input set to '500', and 'PREFERRED SECTORS' with a text input field. Below the sectors field is a note: 'Comma-separated; leave blank for all sectors.' There is a checkbox labeled 'Enable auto-invest' which is checked. At the bottom of the card is a green 'Save settings' button. On the right side of the interface is a 'Copilot' chat window. It shows a header 'VIEWING AS investor1' and a chat area with the prompt 'Ask me about funding, exposure, the pipeline or portfolio.' Below the chat area are four suggested prompts: 'How much have we funded?', 'Which sector has the most exposure?', 'Top debtors by concentration', and 'Summarise the sales pipeline'. At the bottom of the chat is a text input 'Ask about the data...' and a 'Send' button.

Chat-based invoice triage

- Sellers describe an invoice and debtor in plain language; the assistant collects only what is still missing.
- It returns an **indicative risk band (A–D)**, an **advance rate** and the **documents the bank needs next** — in seconds, not days.
- Powered by **Grok (x.ai)**; everything is indicative and subject to verification — no final decision is automated.
- Fully trilingual — the assistant replies in the visitor's language (English, O'zbekcha, Russian).

Ask your portfolio anything

- Investors ask questions in natural language — net return, exposure by sector or debtor, overdue positions, upcoming settlements.
- Answers are **grounded in the investor's own live positions** — every figure traces back to real portfolio data, not invented.
- Concrete and specific: it quotes actual amounts and invoice numbers, and says so plainly when the data can't answer.
- The conversational layer on top of the portfolio cockpit — reporting on demand, in the investor's language.

Start with Factorio

- **Sellers** — submit an invoice and get an offer in 1–3 working days.
- **Investors** — browse the marketplace, build a portfolio, automate with auto-invest.
- Live at **factorio.co.uk** · hello@factorio.co.uk
