

INVOICE FINANCING, END TO END

Factorio — User Guide

Live at factorio.co.uk · hello@factorio.co.uk

Factorio is an invoice-financing (factoring) marketplace. Businesses sell their unpaid invoices for cash today; investors fund those invoices for a short-term, asset-backed return; the back office runs the credit, funding and collections behind it.

This guide is organised by **who you are**. It is split into four clearly separated parts — one per persona. Jump to the part that matches your role; each starts on its own page with a coloured separator.

Part	Persona	Sign in as	What you do
1	Investor	Investor	Fund verified invoices; track a portfolio of short-term, asset-backed returns
2	Supplier	Seller	Sell / discount unpaid invoices for cash in 24–48 hours
3	Payer	Payer	Confirm invoices you owe; run supplier early-payment programmes
4	Admin	Admin	Operate the factoring business — onboarding, risk, funding, collections, compliance

PART 1 OF 4 · SIGN IN AS “INVESTOR”

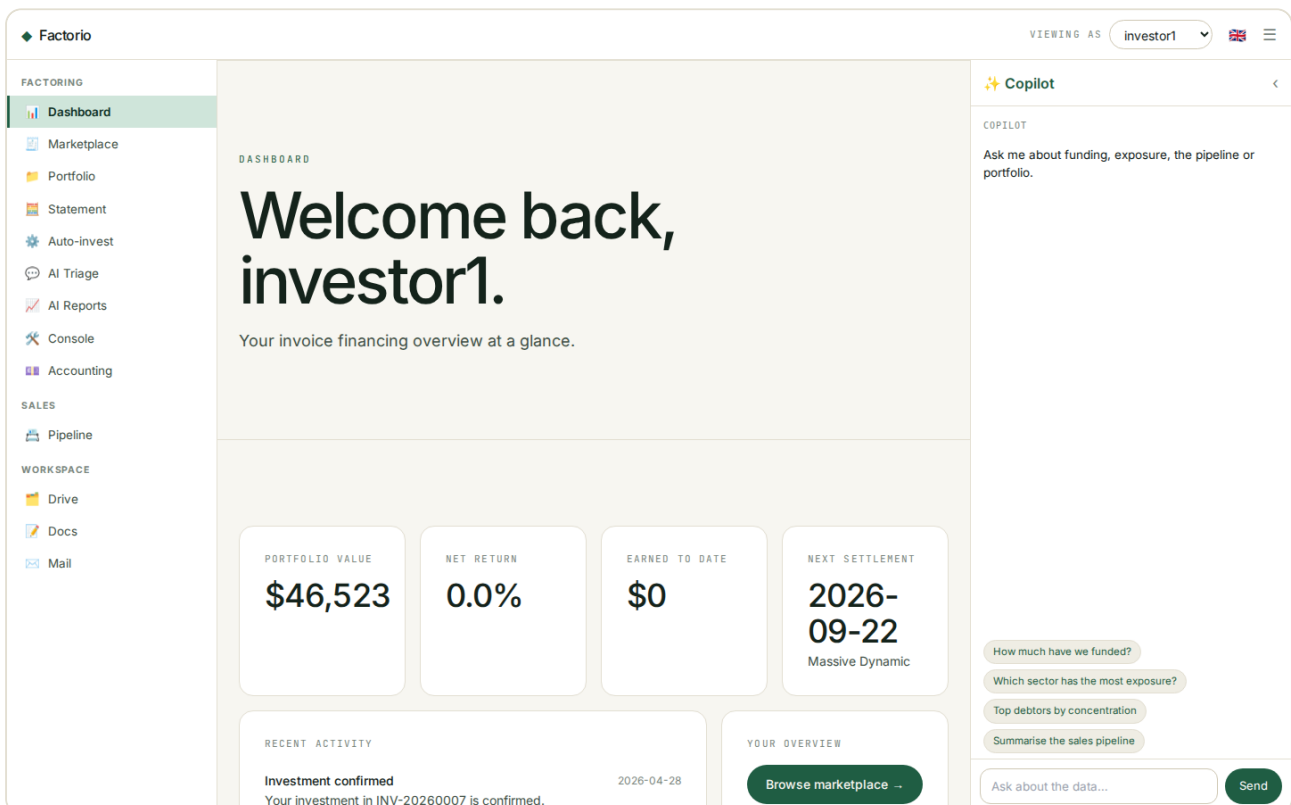

Investor

Put capital into verified invoices for short-term, asset-backed returns.

For investors / funders. The app is a left-nav cockpit with an AI **copilot** on the right for questions about your portfolio and the market. Amounts are shown in USD (multi-currency supported).

Dashboard

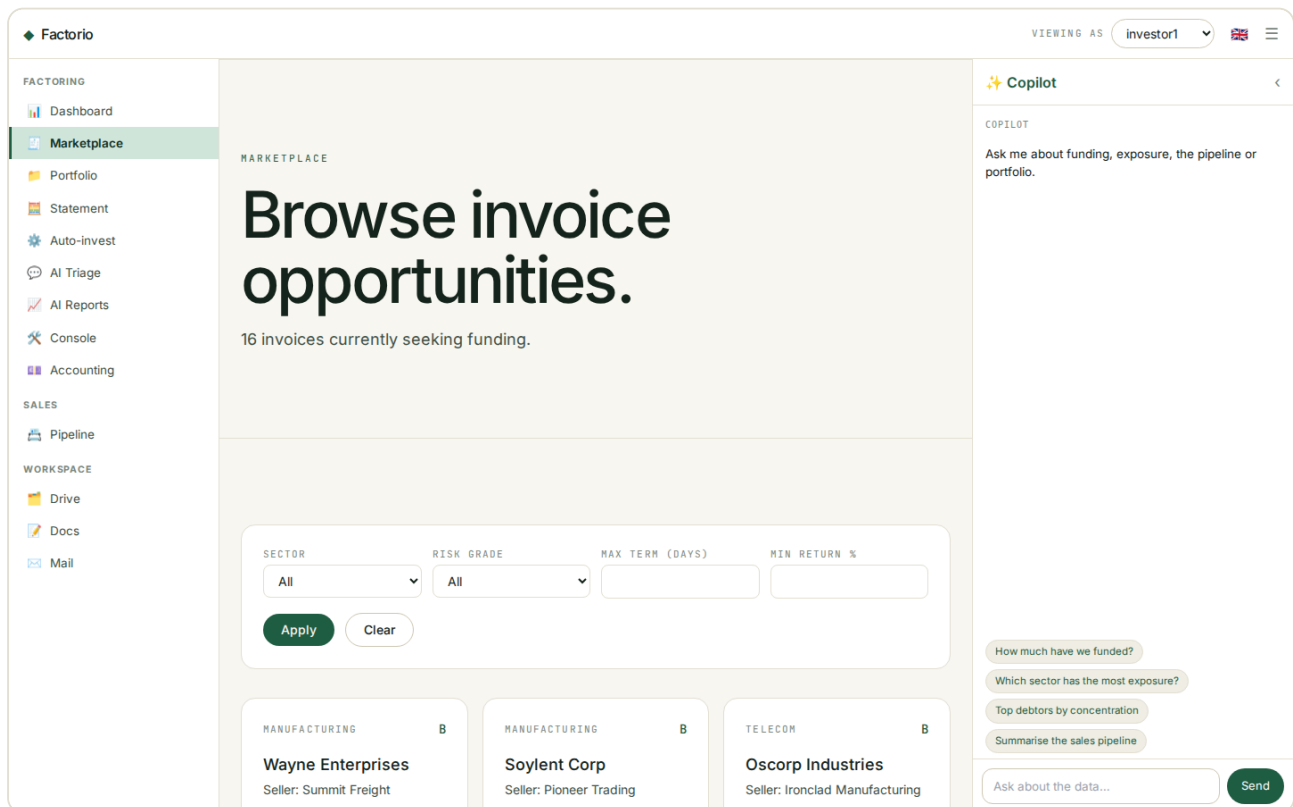

Your personalised overview: **portfolio value, net annual return, earned to date and the next settlement**, a recent-activity feed, and quick actions.

The screenshot displays the Factorio Investor Dashboard. The interface includes a left-hand navigation menu with categories: FACTORING (Dashboard, Marketplace, Portfolio, Statement, Auto-invest, AI Triage, AI Reports, Console, Accounting), SALES (Pipeline), and WORKSPACE (Drive, Docs, Mail). The main content area is titled 'Welcome back, investor1.' and 'Your invoice financing overview at a glance.' It features four key metrics: Portfolio Value (\$46,523), Net Return (0.0%), Earned to Date (\$0), and Next Settlement (2026-09-22, Massive Dynamic). Below these are sections for Recent Activity (showing 'Investment confirmed' on 2026-04-28) and Your Overview (with a 'Browse marketplace' button). On the right, there is a Copilot chat interface with a 'VIEWING AS investor1' dropdown, a 'COPILLOT' header, and a list of suggested questions: 'How much have we funded?', 'Which sector has the most exposure?', 'Top debtors by concentration', and 'Summarise the sales pipeline'. A text input field at the bottom right is labeled 'Ask about the data...' with a 'Send' button.

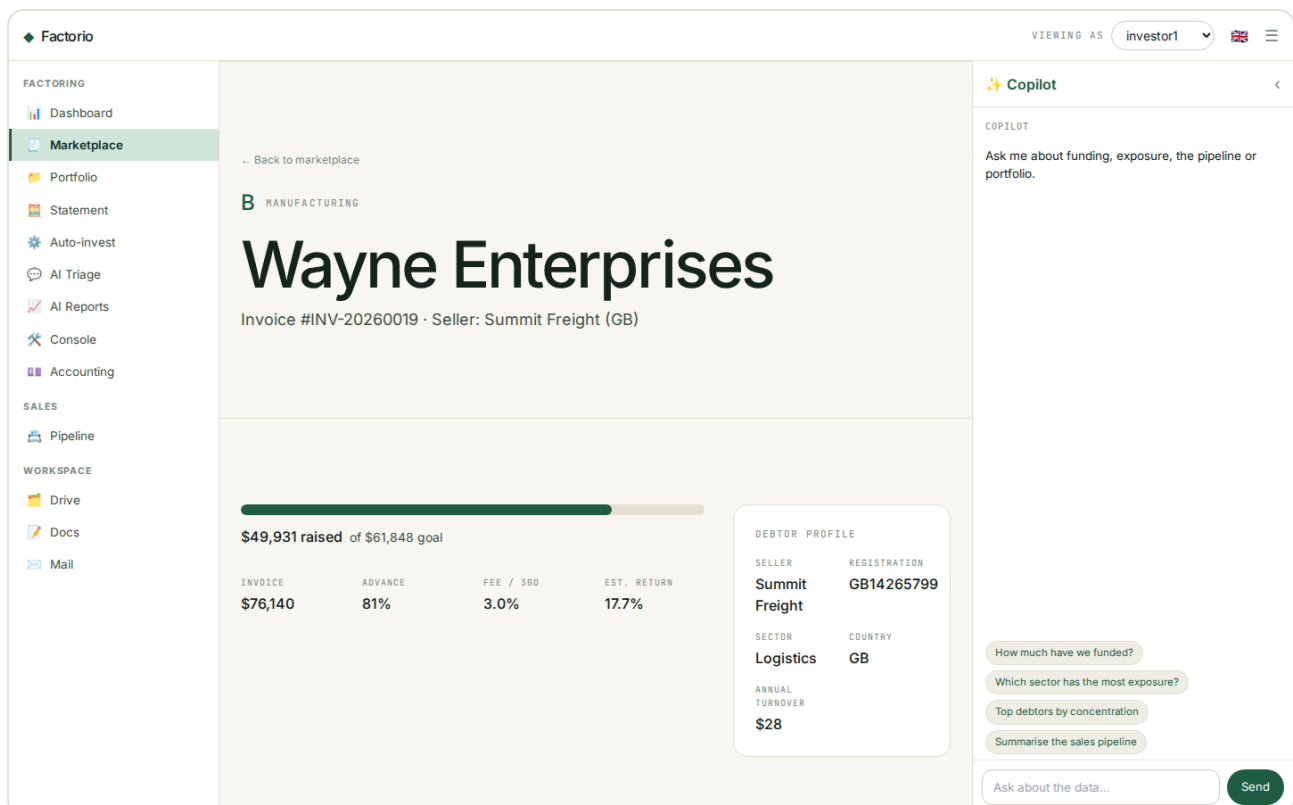

Marketplace

Every open, fundable invoice as a card — debtor, sector, risk grade (A–D), amount and a live funding-progress bar — with advance rate, fee and estimated return. Filter by sector, grade, term and minimum return.

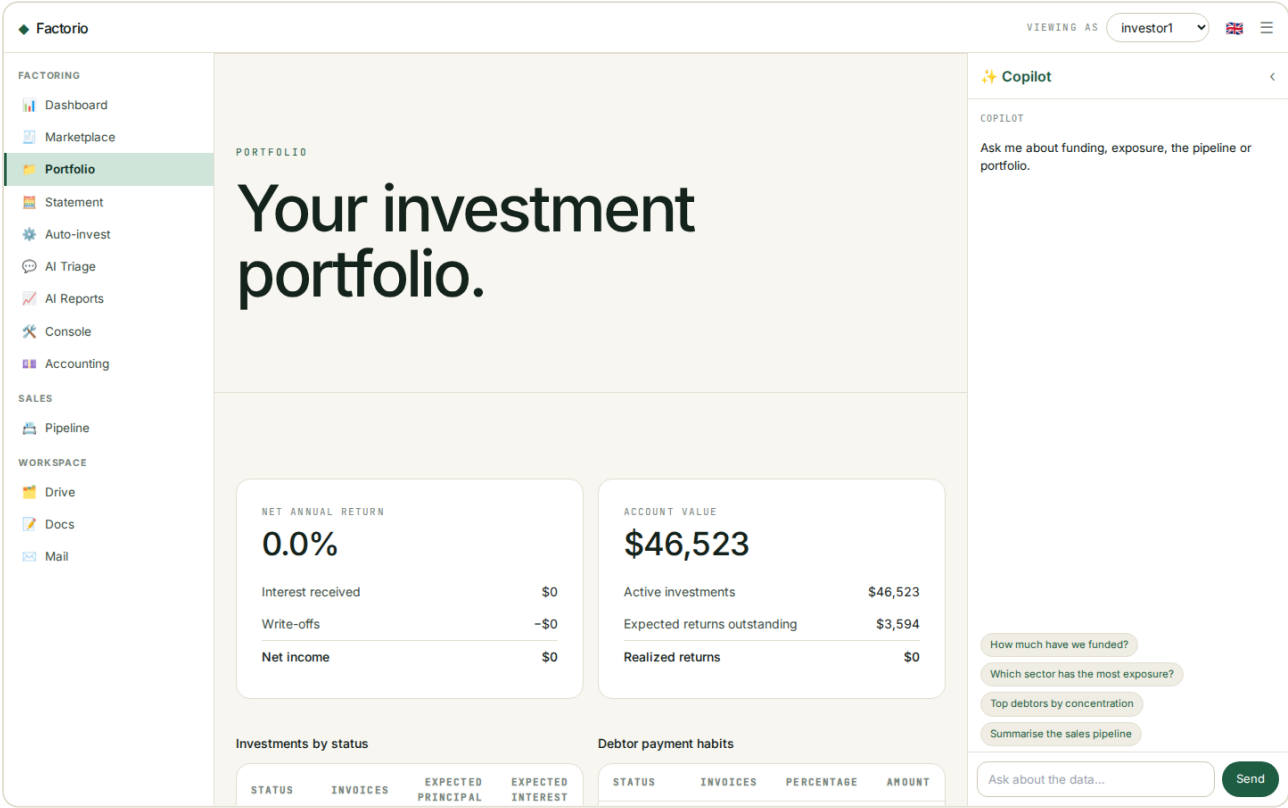

Invoice detail

Full transparency before funding: the funding panel (raised vs goal, advance, fee, estimated return) and a **debtor-company profile** (registration, sector, country, turnover).

Portfolio

The reporting cockpit: **net annual return** and **account value** panels, an **aging table** (days to / past due), a **payment-habits table** (how settled invoices actually paid), and a positions table.

Statement

A unified ledger of cash movements — investments out (–) and settlements in (+) — filterable by date, type, counterparty and amount, with CSV export.

AI reports (copilot)

Ask questions grounded in your own live positions — net return, exposure by sector or debtor, overdue positions, upcoming settlements. The copilot answers from real data, never invented figures.

The screenshot displays the Factorio AI Reports interface. On the left is a sidebar with navigation links categorized under FACTORING, SALES, and WORKSPACE. The main content area features a large heading "Ask anything about your portfolio" and a subheading "AI · PORTFOLIO REPORTING". Below this, a text block explains that the assistant answers questions based on live portfolio data. At the bottom of the main area is a chat input field with a "Send" button. On the right, a "Copilot" sidebar shows a chat history with several example questions and a "Send" button at the bottom.

AI · PORTFOLIO REPORTING

Ask anything about your portfolio

The assistant answers from your own positions — net return, outstanding interest, concentration by debtor or sector, upcoming settlements and more. Grounded in your live portfolio data.

FACTORIO AI

Hi! I can answer questions about your portfolio — returns, outstanding positions, concentration and settlements. What would you like to know?

e.g. What's my exposure to construction? Which positions are overdue?

Send

PART 2 OF 4 · SIGN IN AS "SELLER"

Supplier

Sell or discount your unpaid invoices for cash today instead of waiting 30–90 days.

For suppliers / clients. Factoring, not a loan — no new debt on your balance sheet; funding scales with your sales. Sign in with the **Seller** role.

My applications

Your submitted invoices with debtor, amount, risk grade and status (submitted → verified → funding → funded → settled). Track each from submission to advance.

AI triage — get an indicative offer in a chat

Describe an invoice and debtor in plain language; the assistant collects only what's missing, then returns an **indicative risk band (A–D)**, an **advance rate** and the **documents the bank needs next** — in seconds, in your language. Everything is indicative, subject to verification.

The seller journey

1. **Sign up** (bank KYC).
2. **Submit / import** an invoice (SoliqOnline-verified, buyer-confirmed).
3. **Triage** in chat → indicative terms.
4. **Approval** by the bank (one click) → collateral registered.
5. **Advance** in your account in 24–48 hours; the reserve is released when the debtor pays.

Payer

Confirm the invoices you owe so your suppliers can be financed — and pay your network early without breaking your terms.

For payers / debtors — the buyers who owe the invoices. The payer anchors the credit in factoring: a specific, buyer-confirmed obligation. Sign in with the **Payer** role.

Invoices to confirm

The invoices where you are named as the debtor, with amount, due date and status. **Confirm** the obligation (or dispute it) — confirmation is what lets the supplier draw an advance; on the SoliqOnline rails this confirmation is on official record.

The screenshot shows the Factorio web application interface. The top navigation bar includes the Factorio logo, a role dropdown set to 'Payer', and a language selector. The left sidebar lists various modules under three categories: FACTORING (Dashboard, Marketplace, Portfolio, Statement, Auto-invest, AI Triage, AI Reports, Console, Accounting), SALES (Pipeline), and WORKSPACE (Drive, Docs, Mail). The main content area is titled 'PAYER' and 'Invoices to confirm', with a subtitle explaining that invoices where 'Zorg Industries' is the debtor need confirmation. Below this is a table of invoices to be confirmed.

INVOICE	AMOUNT	DUE	STATUS
INV-20260012	\$199,705	2026-05-27	funding Confirmed
INV-20260026	\$183,266	2026-06-07	funding Confirmed
INV-20260011	\$18,159	2026-08-14	funding Confirmed
INV-20260021	\$97,544	2026-08-23	settled Confirmed

On the right, there is a 'Copilot' chat interface with a text input field and a 'Send' button. The chat area contains a prompt: 'Ask me about funding, exposure, the pipeline or portfolio.' Below the input field, there are four suggested questions: 'How much have we funded?', 'Which sector has the most exposure?', 'Top debtors by concentration', and 'Summarise the sales pipeline'.

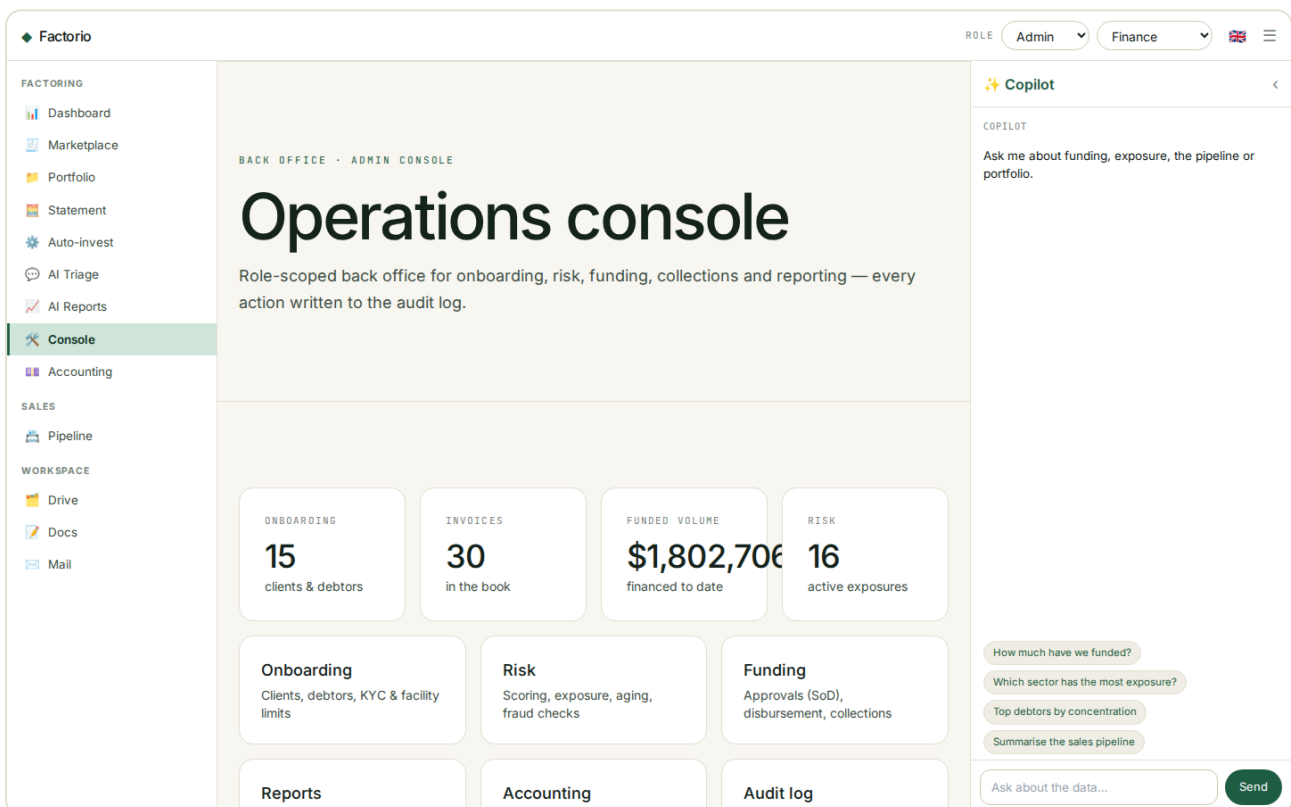

Reverse factoring (supply-chain finance)

As a large buyer you can run a **reverse-factoring programme**: approve early payment for hundreds of suppliers at once. Suppliers get paid early; you keep your payment terms; the platform (funded by the bank, investors or an SPV) bridges the gap.

Admin — Back Office

Operate the factoring business: onboarding, risk, funding, collections, accounting and compliance — under role-based access control with full audit logging.

For internal users: operations, credit, collections, finance, compliance, executives. Reached at `/app/admin`. The workspace is a three-pane cockpit: left navigation (Factoring · Sales · Workspace), the center content, and a right-hand **copilot**. The **Role** switcher (top-right) changes persona; the sub-role (Operations / Credit / Collections / Finance / Compliance / Executive / Super-admin) scopes what actions you can take (**segregation of duties**).

1 · Client & debtor onboarding / management

Screen: Onboarding. KYC/AML status per client and debtor, sector, country, annual turnover, and a derived **facility limit** (advance rates 70–90%). Only **Credit / Compliance / Super** may set limits — other roles see the data read-only.

2 · Invoice processing & verification

Invoices arrive verified against SoliqOnline (buyer-confirmed), assigned, and risk-graded. The pipeline and detail views show amount, advance rate, grade and status; holdback/reserve is the difference between face value and advance.

3 · Funding & disbursements

Screen: Funding. The funding pipeline lists verified/funding invoices with amount, grade, computed advance and status. **Approve & release** is gated to **Finance / Super** — a credit officer cannot release funds. Every approval is written to the audit log.

8 · Compliance, legal & audit

Screen: Audit log. Every state-changing action — who (actor + role), what action, which entity, when — is recorded immutably. This underpins SoD, regulatory reporting and dispute evidence.

The screenshot shows the Factorio application interface. The top navigation bar includes the Factorio logo, a role selector set to 'Admin', a finance dropdown set to 'Finance', and a language selector set to 'EN'. The left sidebar lists navigation items under three categories: FACTORING (Dashboard, Marketplace, Portfolio, Statement, Auto-invest, AI Triage, AI Reports, Console, Accounting), SALES (Pipeline), and WORKSPACE (Drive, Docs, Mail). The main content area is titled 'BACK OFFICE · ADMIN CONSOLE' and features a large 'Audit log' heading. Below the heading is a description: 'Role-scoped back office for onboarding, risk, funding, collections and reporting — every action written to the audit log.' A table displays a single audit entry:

WHEN	ACTOR	ACTION	ENTITY	DETAIL
2026-07-16 19:35	admin:finance	funding.release	invoice INV-1	approved via console

On the right, a 'Copilot' chat window is open, showing a prompt: 'Ask me about funding, exposure, the pipeline or portfolio.' Below the prompt are four suggested questions: 'How much have we funded?', 'Which sector has the most exposure?', 'Top debtors by concentration', and 'Summarise the sales pipeline'. At the bottom of the chat window is a text input field with the placeholder 'Ask about the data...' and a 'Send' button.
