

Factorio — Supplier (Seller) User Guide

For **suppliers / clients** who sell or discount their unpaid invoices for cash today instead of waiting 30–90 days. Sign in with the **Seller** role.

Factoring, not a loan — no new debt on your balance sheet; funding scales with your sales.

My applications

Your submitted invoices with debtor, amount, risk grade and status (submitted → verified → funding → funded → settled). Track each from submission to advance.

AI triage — get an indicative offer in a chat

Describe an invoice and debtor in plain language; the assistant collects only what's missing, then returns an **indicative risk band (A–D)**, an **advance rate** and the **documents the bank needs next** — in seconds, in your language. Everything is indicative, subject to verification.

The seller journey

1. **Sign up** (bank KYC).
2. **Submit / import** an invoice (SoliqOnline-verified, buyer-confirmed).
3. **Triage** in chat → indicative terms.
4. **Approval** by the bank (one click) → collateral registered.
5. **Advance** in your account in 24–48 hours; the reserve is released when the debtor pays.
