

Factorio — User Guide

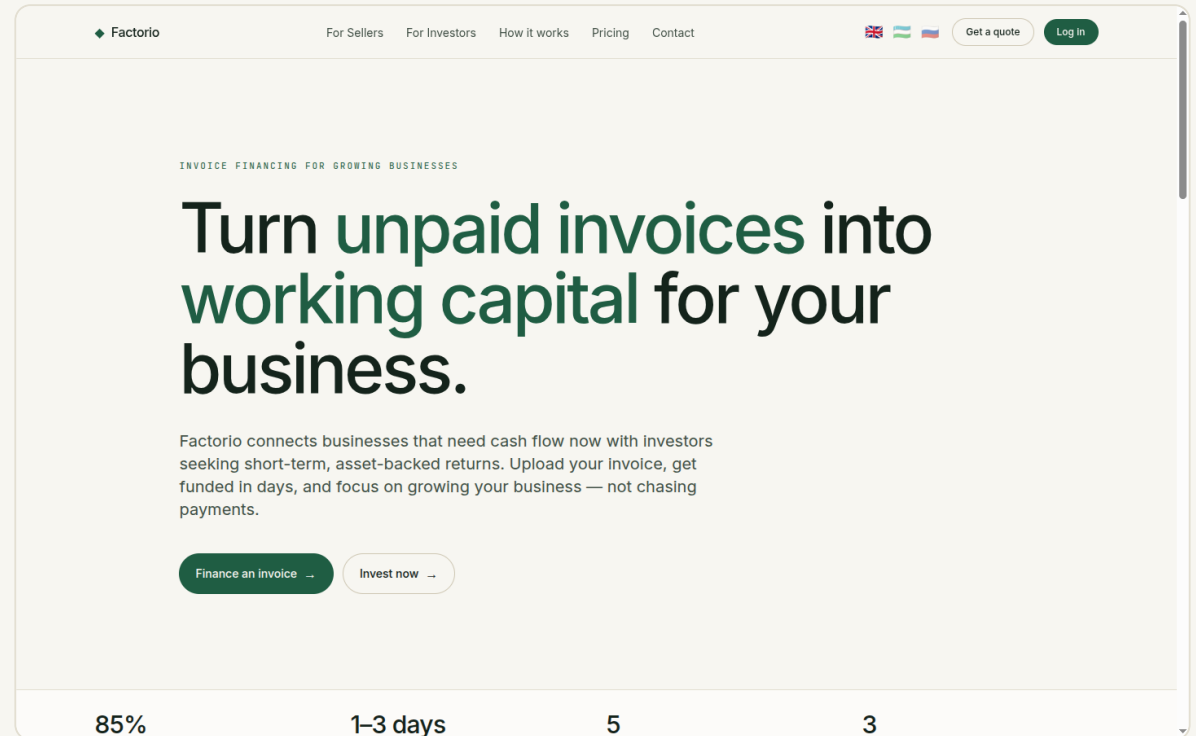

Invoice financing, end to end

Generated 2026-07-06 · Live at factorio.co.uk

Factorio is an invoice-financing (factoring) marketplace. Businesses sell their unpaid invoices for cash today; investors fund those invoices for a short-term, asset-backed return. This guide walks through every screen — the public site and the investor product app — one screen per slide.

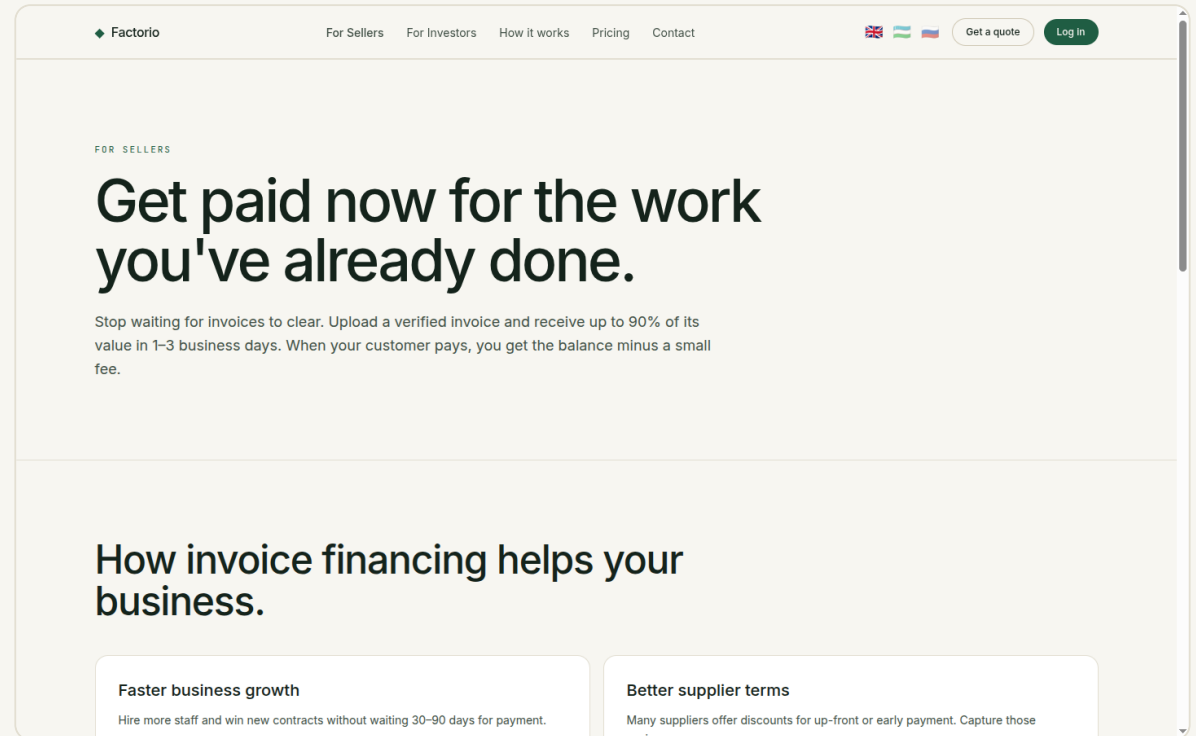

What Factorio is

- An invoice-financing marketplace connecting two sides: **sellers** who need cash now and **investors** seeking short-term, asset-backed returns.
- One site serves both — a marketing front and an HTMX-driven product app.
- The hero summarizes the model: advance rate, days-to-funding, sectors served and total funded volume (UZS).
- Fully trilingual — English, O'zbekcha and Russian — switched from the top navigation.

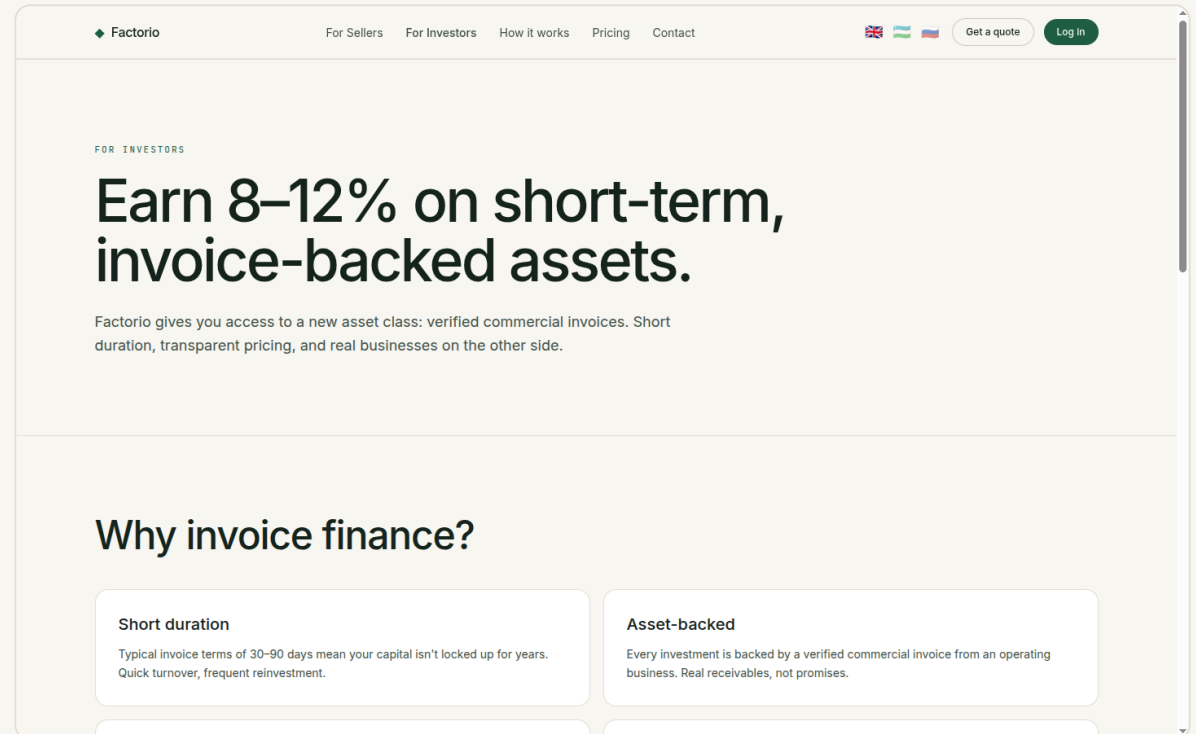

Turn invoices into working capital

- Get a large share of an invoice advanced in days instead of waiting 30–120 days for the debtor to pay.
- The seller journey: submit an invoice → get it verified and risk-graded → receive the advance → settle when the debtor pays.
- Factoring, not a loan — no new debt on the balance sheet; funding scales with sales.
- Built for manufacturing, wholesale, construction, logistics and services.

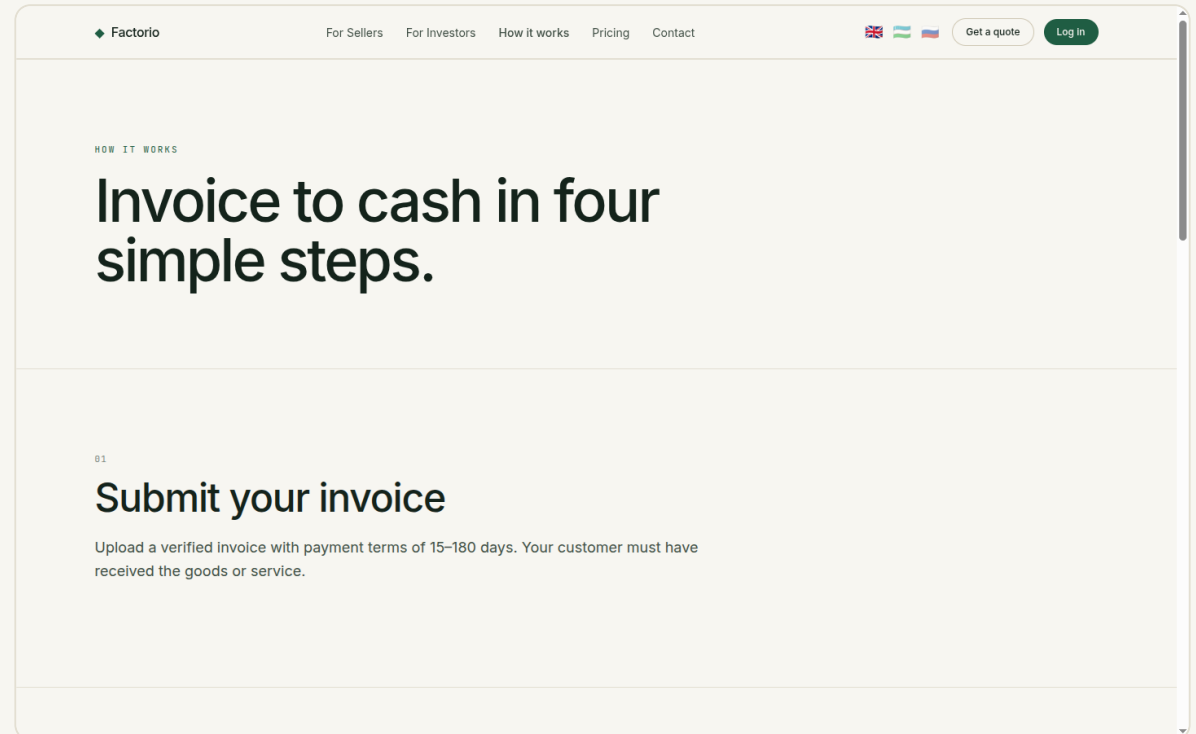

Short-term, asset-backed returns

- Fund verified invoices and earn a fee/return over a short hold — often just weeks.
- Diversify across debtors, sectors and risk grades (A–D).
- Returns are tied to real receivables, not market speculation.
- Leads into the investor app — dashboard, marketplace and portfolio.

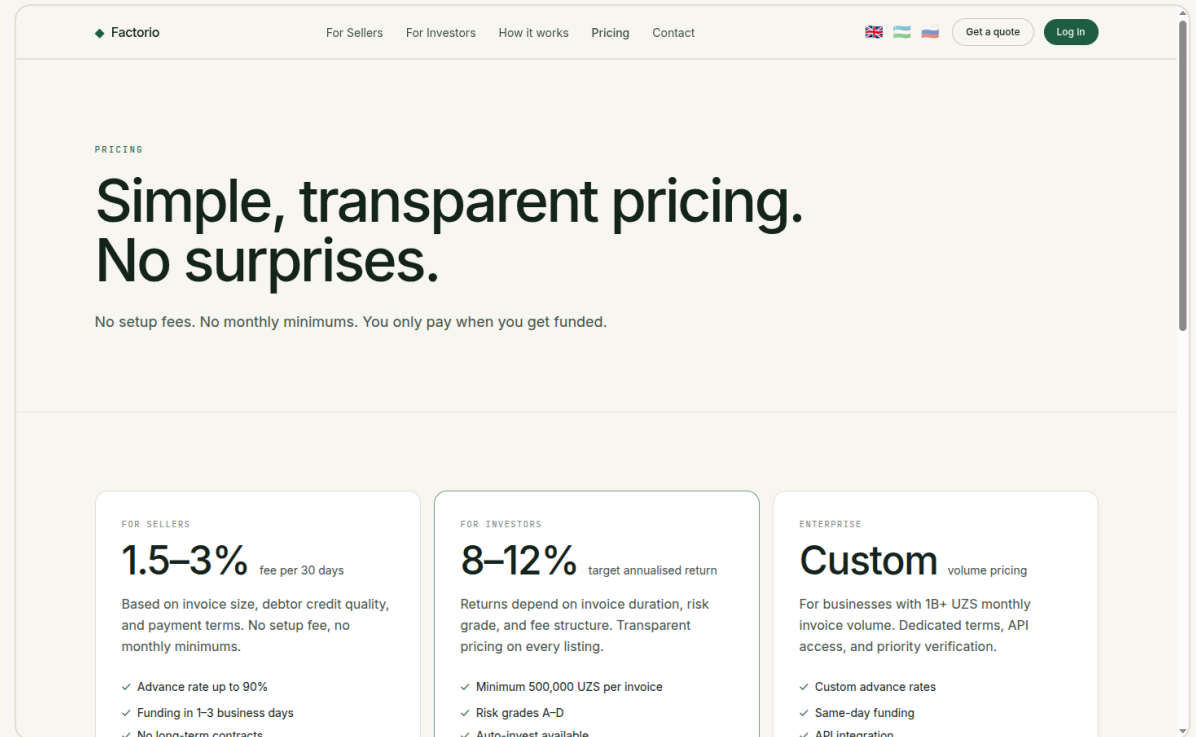

Four steps, end to end

- **Submit** — a seller uploads an invoice and company details.
- **Verify** — Factorio checks the debtor and assigns a risk grade and pricing.
- **Fund** — the invoice appears on the marketplace; investors fund it to its goal.
- **Settle** — when the debtor pays, principal + interest are distributed and the position closes.

Transparent, per-invoice fees

- Pricing is per invoice — a fee per 30 days against the advanced amount, with no hidden charges.
- Shows the headline advance rate and worked example economics.
- No subscription and no commitment to submit an invoice.
- A clear breakdown so both sides understand the return and the cost.

The screenshot shows the Factorio website's pricing page. The header includes the Factorio logo and navigation links for Sellers, Investors, How it works, Pricing, and Contact. There are also flags for the UK, Germany, and the USA, along with 'Get a quote' and 'Log in' buttons. The main heading is 'Simple, transparent pricing. No surprises.' followed by the text 'No setup fees. No monthly minimums. You only pay when you get funded.' Below this, there are three columns representing different pricing tiers: 'FOR SELLERS' with a 1.5-3% fee per 30 days, 'FOR INVESTORS' with an 8-12% target annualised return, and 'ENTERPRISE' with custom volume pricing. Each column includes a brief description and a list of features.

FOR SELLERS

1.5–3% fee per 30 days

Based on invoice size, debtor credit quality, and payment terms. No setup fee, no monthly minimums.

- ✓ Advance rate up to 90%
- ✓ Funding in 1–3 business days
- ✓ No long-term contracts

FOR INVESTORS

8–12% target annualised return

Returns depend on invoice duration, risk grade, and fee structure. Transparent pricing on every listing.

- ✓ Minimum 500,000 UZS per invoice
- ✓ Risk grades A–D
- ✓ Auto-invest available

ENTERPRISE

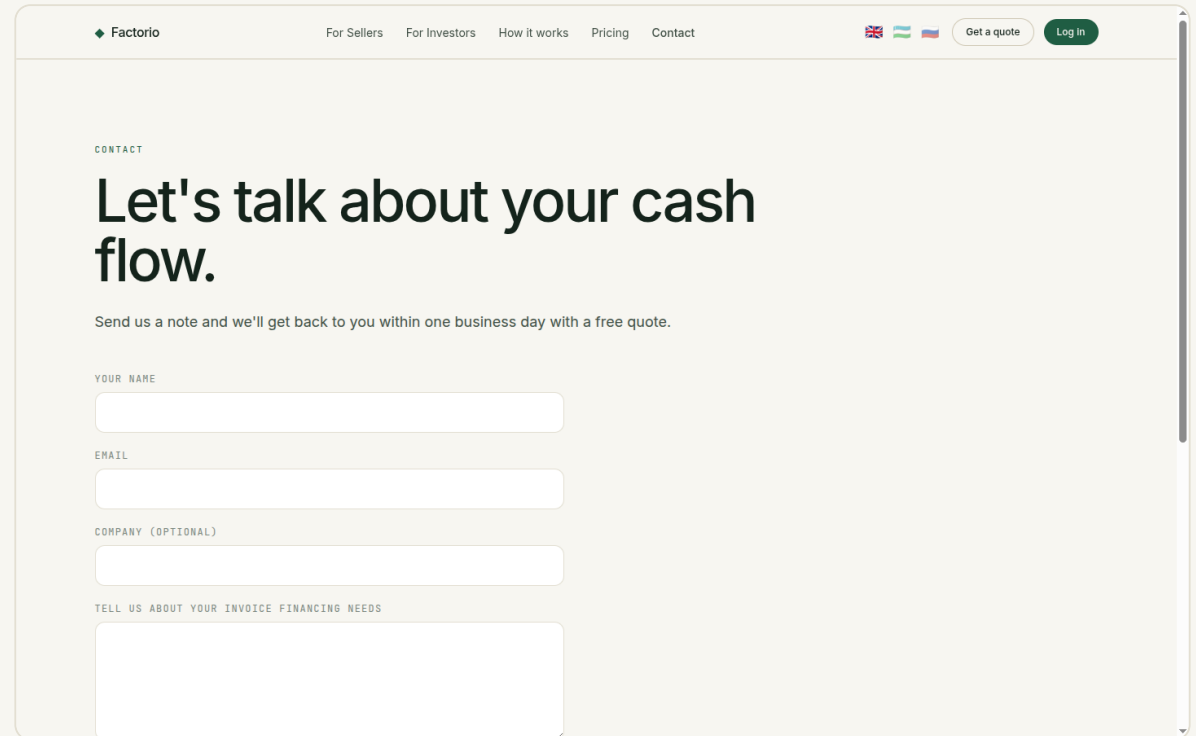

Custom volume pricing

For businesses with 1B+ UZS monthly invoice volume. Dedicated terms, API access, and priority verification.

- ✓ Custom advance rates
- ✓ Same-day funding
- ✓ API integration

Get in touch

- A contact page for sellers and investors to reach the Factorio team.
- Shows the contact email and a simple enquiry form.
- The entry point to start onboarding.

The screenshot shows the Factorio website's contact page. The header includes the Factorio logo, navigation links for 'For Sellers', 'For Investors', 'How it works', 'Pricing', and 'Contact', along with flags for the UK, Germany, and the USA, and buttons for 'Get a quote' and 'Log in'. The main content area features the heading 'CONTACT' followed by the large text 'Let's talk about your cash flow.' Below this is a subheading 'Send us a note and we'll get back to you within one business day with a free quote.' The form consists of four input fields: 'YOUR NAME', 'EMAIL', 'COMPANY (OPTIONAL)', and a larger text area labeled 'TELL US ABOUT YOUR INVOICE FINANCING NEEDS'.

Your personalized overview

- The `/app` home greets the current investor and leads with their own KPIs: portfolio value, net annual return, earned-to-date and the next settlement.
- A recent-activity feed surfaces notifications — fundings, settlements and updates.
- Quick actions jump to the marketplace, portfolio and statement.
- Platform-wide stats are kept as a secondary strip.
- Top-right **investor switcher** lets you view the app as any investor (demo, no password).

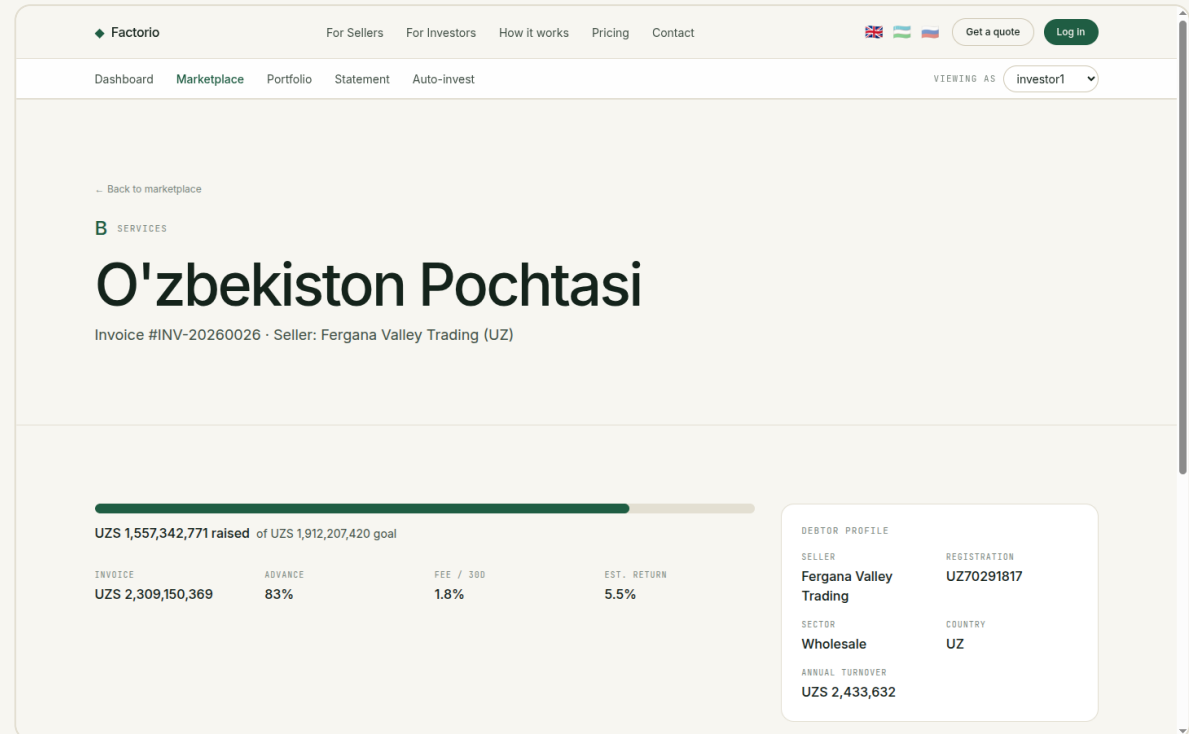

Browse fundable invoices

- Every open, fundable invoice is a card: debtor, sector, risk grade, amount and a live funding-progress bar.
- Each card shows the key economics — advance rate, fee per 30 days and estimated return — plus the target hold in days.
- The filter bar narrows by sector, risk grade, maximum term and minimum return.
- Click a card to open the full invoice detail.

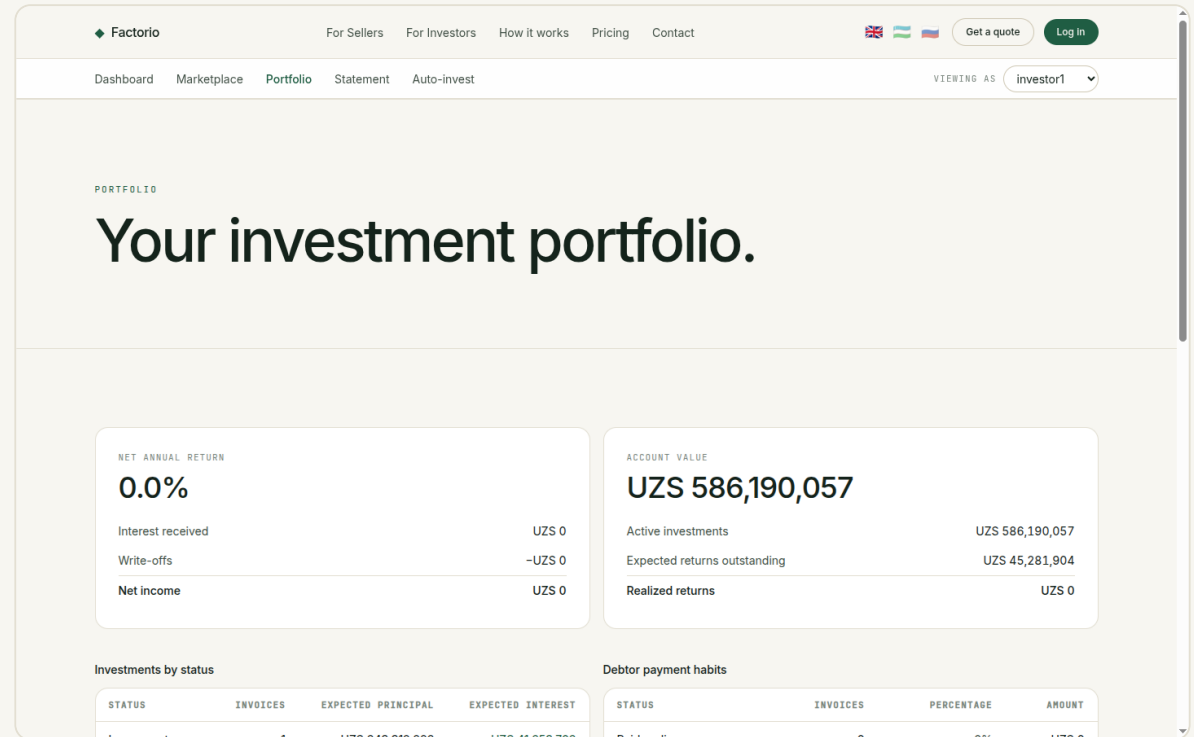

Full transparency before you invest

- The headline shows the debtor, risk grade, sector and invoice number.
- A funding panel: amount raised vs goal, advance rate, fee and estimated return.
- A **debtor-company profile** lists registration number, sector, country and annual turnover.
- Everything needed to make a funding decision on a single screen.

The reporting cockpit

- Two hero panels: **net annual return** (interest received, write-offs, net income) and **account value** (active invested, expected outstanding, realized).
- An **investments aging table** buckets active positions by days to / past due.
- A **payment-habits table** shows how settled invoices actually paid — early, on time, late or written off.
- A positions table lists every investment with realized return, settlement date, grade and status.

Every transaction, filterable

- A unified ledger of cash movements: investments out (–) and settlements in (+).
- Filter by date range, type, counterparty, invoice number and minimum amount.
- Signed amounts in UZS, newest first.
- One-click **CSV export** for bookkeeping and reconciliation.

Set rules, invest automatically

- Configure automated bidding: minimum risk grade, maximum amount per invoice and preferred sectors.
- Toggle the strategy active/inactive; the status is shown at the top.
- Rules are saved per investor and applied to matching new invoices.
- Modelled on investly.co's autobidder.

The screenshot shows the Factorio web application interface. At the top, there's a navigation bar with links for 'For Sellers', 'For Investors', 'How it works', 'Pricing', and 'Contact'. A 'Get a quote' button and a 'Log in' button are on the right. Below this is a secondary navigation bar with 'Dashboard', 'Marketplace', 'Portfolio', 'Statement', and 'Auto-invest' (which is highlighted). A 'VIEWING AS investor1' dropdown is on the right. The main content area is titled 'AUTO-INVEST' and features a large heading 'Automate your investing.' with a subtext 'Set your rules and let Factorio place bids on matching invoices automatically.' Below this is a settings card. The card has a 'STATUS' section with an 'Active' toggle. It includes a 'MINIMUM RISK GRADE' dropdown set to 'A' and a 'MAX PER INVOICE' input field set to '1000000.00'. There's a 'PREFERRED SECTORS' input field containing 'energy'. A note below says 'Comma-separated; leave blank for all sectors.' A checkbox 'Enable auto-invest' is checked. At the bottom of the card is a 'Save settings' button.

Chat-based invoice triage

- Sellers describe an invoice and debtor in plain language; the assistant collects only what is still missing.
- It returns an **indicative risk band (A–D)**, an **advance rate** and the **documents the bank needs next** — in seconds, not days.
- Powered by **Grok (x.ai)**; everything is indicative and subject to verification — no final decision is automated.
- Fully trilingual — the assistant replies in the visitor's language (English, O'zbekcha, Russian).

Ask your portfolio anything

- Investors ask questions in natural language — net return, exposure by sector or debtor, overdue positions, upcoming settlements.
- Answers are **grounded in the investor's own live positions** — every figure traces back to real portfolio data, not invented.
- Concrete and specific: it quotes actual amounts and invoice numbers, and says so plainly when the data can't answer.
- The conversational layer on top of the portfolio cockpit — reporting on demand, in the investor's language.

Start with Factorio

- **Sellers** — submit an invoice and get an offer in 1–3 working days.
- **Investors** — browse the marketplace, build a portfolio, automate with auto-invest.
- Live at **factorio.co.uk** · hello@factorio.io
